

CLIMATE SMART

Village Farms Davis strives to incorporate approaches, practices, and technologies designed to address climate change challenges while enhancing sustainability and resilience.

- Enhance Urban Forest
- 47.1 Acres of Preserved Natural Habitat
- 118.4 Acres out of Active Ag Production, increasing potential for soil carbon sequestration
- All Electric
- EV Charging Infrastructure
- Enhancing existing bike/ped infrastructure
- Increasing opportunities to utilize mass transit
- Zipcar
- Increase renewal energy sources for residential via solar panels on all homes
- Exceeding Title 24 Standards per the City of Davis building code requirements
